Products and Services
A robust and secure connectivity platform, Microsoft 365 and Liquid's bouquet of security solutions.

> " Liquid has successfully addressed our connectivity and productivity challenges by implementing connectivity and Microsoft 365 solutions. We now enjoy reliable connectivity, increased productivity and enhanced data security. "
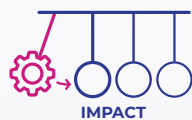

Situation

CHALLENGE

The company was struggling to maintain seamless connectivity across its branches and needed to enhance operations and ensure more efficient communications. The disruptions in communication and data were affecting productivity. The company was also concerned about data security and wanted a robust solution to protect its information.

Solution

SOLUTION

Liquid's solution included a connectivity platform that directly resolved Tanzania Breweries Limited's network challenges but also inefficiencies within its applications. The Liquid Data Security solution, providing firewalls, encryption and intrusion detection, among other high-end security capabilities, was implemented to protect the organisation's sensitive financial data. In addition, Liquid implemented a comprehensive Microsoft 365 ecosystem within the company to streamline collaboration, file sharing and real-time communication.

Impact

IMPACT

Tanzania Breweries Limited has successfully resolved its connectivity, operational, security and productivity challenges. In addition to improved collaboration, productivity and workflows, the company benefits from enhanced data security and an empowered workforce.
