Products and Services
150Mbps internet capacity, network infrastructure, managed wi-fi services

W The provided solution furnished the entertainment hub with a reliable network, enabling the broadcasting of live events to both local and international media platforms at their discretion. With this capability in place, the venue has incorporated it into their list of offerings, paving the way for a new revenue stream.

CHALLENGE

Situation

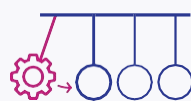

The state-of-the-art sports and entertainment hub with a hosting capacity of around 10,000 seats was looking for connectivity solutions to address existing challenges impacting service quality and hindered the addition of Wi-Fi as a customer amenity. Liquid was tasked to the facility's IT infrastructure to identify the most suitable technology for establishing a resilient and dependable Wi-Fi network.

SOLUTION

Solution

Liquid designed a comprehensive solution that included 150Mbps capacity to enhance connectivity, robust access points to increase coverage to 100%, secure and efficient wi-fi coverage transmission throughout the venue, and managed wi-fi services.

IMPACT

Impact

The solution had an overwhelming impact on the venue's businesses thanks to boosted collaboration: a new revenue stream, customer satisfaction and of course a reliable network connectivity..
